

David Pelayo

Senior Engineer

hi@davidpelayo.com - davidpelayo.com

About me

I am a Senior Engineer based in Spain. I love writing clean, well-tested code. For the last 8+ years, I have been, remotely, building web applications for international startups. I collaborate now as a Lead Senior Engineer and Consultant with Netcentric, A Cognizant Digital Business.

I experimented in my twenties with being a [product designer](#) and entrepreneur running [two companies](#) from scratch but kept on working hard remotely.

Founded late in 2019 [my own digital business](#) via the e-Residency program in Estonia.

Skills

Craftsmanship

I'm a huge fan of quality engineering. I think carefully about software design, write clean, modular code and test everything I can. I follow industry best practices and implement automated tooling to ensure I continuously improve my code.

Teamwork

Working in teams gets the best out of me. My code improves fastest when it's reviewed by skilled peers. I draw on previous experience as a Product Manager to continuously improve the way we work. I'm also a great communicator with experience as a Professional Educator.

Speed

I'm used to working in fast-paced, rapidly changing environments. I like to ship often and be guided by real-world usage.

Curiosity Learning every day is a big reason I work as a developer. I love the fast-changing world of the browser and embrace the fact that my knowledge may be deprecated in six months or less.

Projects

[KIA Europe](#) - (10.2020 - Present)

Dozens of markets' websites and their digital services and applications tailored for its end customers rebranded and enhanced since Q3 2020.
